SUMMARY

Backend-focused Software Engineer with hands-on experience building **REST APIs** and **microservices** using **Java** and **Spring Boot**, backed by full-stack delivery across the **MERN stack**. Experienced with **Java 8 (Stream API, Lambda Expressions, Functional Interfaces)**, Spring Security, **JWT authentication**, MySQL, and **Apache Kafka**, with practical exposure to integrating **LLM APIs** (Spring AI, Gemini, OpenAI). Currently working on a telecommunications Order Process Management application at Capgemini.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL
Java Core: Java 8 Features, Stream API, Lambda Expressions, Functional Interfaces, Generics, Collections Framework, Multithreading, Exception Handling
Core CS Fundamentals: Object-Oriented Programming (OOP), Data Structures, Algorithms
Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring Cloud, Spring AI, Node.js, Express.js
APIs & Architecture: RESTful APIs, Microservices, JWT Authentication, API Gateway, Service Discovery (Eureka), OpenFeign, WebSockets (STOMP), Swagger (OpenAPI)
Workflow & BPM: Camunda
Databases & Messaging: MySQL, MongoDB, Redis, Apache Kafka
Frontend: React.js, HTML5, CSS3, Tailwind CSS
AI Integration: LLM Integration, Spring AI, Google Gemini API, OpenAI API, Prompt Engineering
AI-Assisted Dev: GitHub Copilot, Cursor, Codex, AntiGravity IDE
Tools & Practices: Docker, Git, GitHub, Maven, Postman, Spring Boot Actuator, IntelliJ IDEA, Agile/Scrum, SDLC

EXPERIENCE

Software Engineer | Capgemini, Bangalore, India | June 2026 – Present
Tech Stack: Java 8, Stream API, Lambda Expressions, Functional Interfaces, Multithreading, Collections, Spring Boot, Microservices, REST APIs, Swagger, Actuator, Cron Jobs, Agile

- Contributing to a telecommunications Order Process Management application supporting internet, mobile, and cable services, working on **backend development** and maintenance using **Java** and **Spring Boot**.
- Developed and maintained **backend components**, configured **application logging** for troubleshooting, and managed **cron jobs** for scheduled tasks to keep order-processing workflows reliable.
- Documented APIs using **Swagger** and monitored application health with **Spring Boot Actuator**.
- Undergoing enterprise training in **Generative AI** and enterprise AI use cases while contributing to live projects on the Integration team.

Software Engineer Intern | Capgemini, Bangalore, India | Feb 2026 – Apr 2026
Tech Stack: Java, Spring Boot, Spring AI, Gemini API, REST APIs, Prompt Engineering

- Built an **AI-powered email assistant** using **Spring Boot**, **Spring AI**, and the **Gemini API** to automate response generation.
- Designed, developed, and tested **REST APIs** in Java and Spring Boot; applied **prompt engineering** to improve AI response accuracy.

Full Stack Developer (Freelance) | Italy-based Client, Remote | Apr 2025 – Dec 2025
Tech Stack: MongoDB, Express.js, React.js, Node.js, RESTful APIs

- Developed and maintained **full-stack web applications** for an international client using the **MERN stack**.
- Designed responsive user interfaces, integrated **RESTful APIs**, implemented new features, and **optimized application performance**.

Full Stack Developer Intern | MagnifyX, London (Remote) | Dec 2024 – Apr 2025
Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Redesigned a **responsive hospital website** to improve user experience and interface consistency.
- Developed an **admin dashboard** for appointment scheduling and lead management.

PROJECTS

CodeCollab | 2026

Tech Stack: Spring Boot, Spring Cloud, React, WebSockets, Spring AI, MySQL, MongoDB, Docker

- Architected a **microservices** system with **API Gateway**, **Service Registry (Eureka)**, User Auth, Collaboration, AI, and Code Execution services following the database-per-service pattern.
- Engineered **real-time collaborative coding rooms** using **Spring WebSocket (STOMP/SockJS)** and React with Monaco Editor, enabling low-latency multi-user code synchronization and live chat.
- Integrated **AI-driven** developer workflows with **Spring AI** and **OpenAI** for automated code reviews, intelligent hints, and dynamic DSA problem generation.
- Built an isolated multi-language code execution service and enforced security with **JWT stateless authentication**, **Spring Cloud Gateway** routing, and **OpenFeign** for inter-service communication.

SubPulse | June 2026

Tech Stack: Spring Boot, React, MySQL, Microservices, Eureka, API Gateway, Gemini API

- Built a **microservices-based** subscription management platform using **Spring Boot**, **Eureka** service discovery, and **API Gateway**.
- Developed **JWT-secured REST APIs** for user and subscription management.
- Implemented automated email reminders for renewals and integrated the **Gemini API** for AI-powered assistance.

Key-N-Share | July 2025

Tech Stack: Next.js, Node.js, Solana, IPFS, Web3.js

- Built a **decentralized dataset marketplace** on a hybrid architecture: **Solana** for low-cost, sub-second transaction settlement, **IPFS** for censorship-resistant encrypted storage, and a **Node.js** backend for core logic and cryptographic operations.
- Engineered an **end-to-end encrypted** data pipeline using **AES-256** and **RSA-OAEP-SHA256** (no plaintext written to disk), embedding a user-specific digital watermark in every purchased file for anti-piracy traceability.
- Implemented **SHA-256 on-chain content hashing** for duplicate-upload blocking and proof of authorship, with a wallet-to-email identity layer for privacy and verified-purchase seller ratings.

EDUCATION

B.Tech in Computer Science and Engineering | CGPA: 9.61/10 | Aug 2022 – June 2026

G H Raisoni College of Engineering and Management, Nagpur, India

ADDITIONAL & EXTRACURRICULAR

- **LeetCode:** leetcode.com/u/ankitkatole
- **Peer Teacher**, Apache Kafka: producers, consumers, topics, event-driven architecture.
- **Treasurer**, Cortex Forum, GHRCEM: managed annual budget and coordinated events for 300+ attendees.
